To: All Concerned Customers of Johnson Matthey Noble Metals, NA

From: Doug Teal
General Manager – Noble Metals
West Chester, PA

Re: Compliance with EU RoHS2 (RoHS re-cast) and WEEE Directives

This letter is to advise you of our marketed product compliance status in respect of the European Union (EU) Directive 2011/65/EU - Restriction on the use of certain Hazardous Substances (RoHS2, re-cast); and Directive 2012/19/EU, Waste Electrical and Electronic Equipment (WEEE).

We are complying as follows:

1. All of the metallic products that we melt and form conform with the applicable limits for Cadmium, Lead and Chromium. None of the other RoHS specified substances are intentionally added to our products, or are known to be present above applicable content thresholds.
2. All other raw materials that go into the components we machine, cut, grind, lap, weld, draw, anneal, tumble, blast and clean are absent of substances designated as Substances of Very High Concern (SVHC) under the Authorization Title of the EU REACH Regulation 1907/2006/EC to the best of our knowledge.
